ENCODER  
4K/H.265

DVB T2 S2 C HDMI 4K ULTRAHD H.265 HEVC

# MODEL IDH2 9200

**IDH2 9200** series of encoder features a high density to allow for five encoding modules, where each module has four SD/ HD encoding channels, or 1 UHD encoding channel, to make up to 4 and a maximum of 20 channels of H.265/HD encoding, or 1 and a maximum of 5 channels of H.265/HEVC encoding. PSI/SI processing, multiplexing and re-multiplexing outputs over DVB-ASI and IP. This encoder also supports Web browser and management for local and remote management and maintenance. Supports dual power supply.

Telelynx introduces a high-performance, high-density high-definition (HD) encoder with a modular design based on advanced H.265 (HEVC) compression. It incorporates the state-of-the-art hardware compression technologies to deliver multi-standard, multi-profile and multi-channel capabilities for cable, satellite, and terrestrial broadcasting applications.
